

Pick me up

Content

- Library tries new ideas to attract students to read, write and maximize use of library.
- This year we started Pick me up activity. Many times, faculty, students or an outside person wants to donate books or any other reading material like old reports, proceedings, notes etc.
- Library may not want to accept this material because it may be duplicate or may not be in good condition. It may not be relevant also.
- But according to basic laws of library science stated by Dr. S.R.Rangnathan every book has its reader and every reader his/her book.
- This reading material kept on a table at the entrance of the library so that anybody wants to take my pick it up and make use of the material. It is totally free of cost.

Goals

- To make maximum use of any reading material
- This material may not be useful for library but may be useful for students.
- This activity is useful to attract more students to the library

Evidence of success

- Register
